FRIDAY, JUNE 9, 1922

## School Program Will Be Given Thurs. Evening

Graduation exercises of the Sierra Madre School will take place next Thursday evening in the Woman's Club House.

High School commencement exercises will take place at Pasadena the same evening. It is a source of regret to Superintendent Reynolds and all others concerned that the two events conflict. But lack of suitable auditorium facilities seems to allow no alternative.

A splendid program has been prepared by the pupils and teachers for the graduation exercises, and will be as follows:

### Program

Entrance of Graduates  
Invocation ..... Rev. W. J. Thompson  
Salutatory ..... Annetta Carter  
Chorus ..... "The Merry Makers"  
By Eighth Grade  
Class History ..... Sarah Schwartz  
Instrumental Trio ..... Selected  
Class Prophecy ..... Allen Hearne  
Song ..... "Lullaby"  
Virginia Barbour and Louise Pruden  
Class Will ..... Dale Langley  
Chorus ..... "Welcome Pretty Primrose"  
Eighth Grade Girls  
Violin Solo ..... Selected  
Reginald Bland  
Valedictory ..... Velma Reavis  
Solo ..... "Sunrise and You"—Penn  
Mrs. Irene Gay  
Accompaniment, Miss Edith Evans  
Passing of the Flag—  
Class A to Class B.  
Presenting of Diplomats  
By Dean Shaw, President of School  
Board.  
March of the Flower Girls

### TREATMENT OF FROSTED TREES TO BE SHOWN

Citrus Expert To Hold Demonstration  
On Pegler Ranch Next  
Wednesday

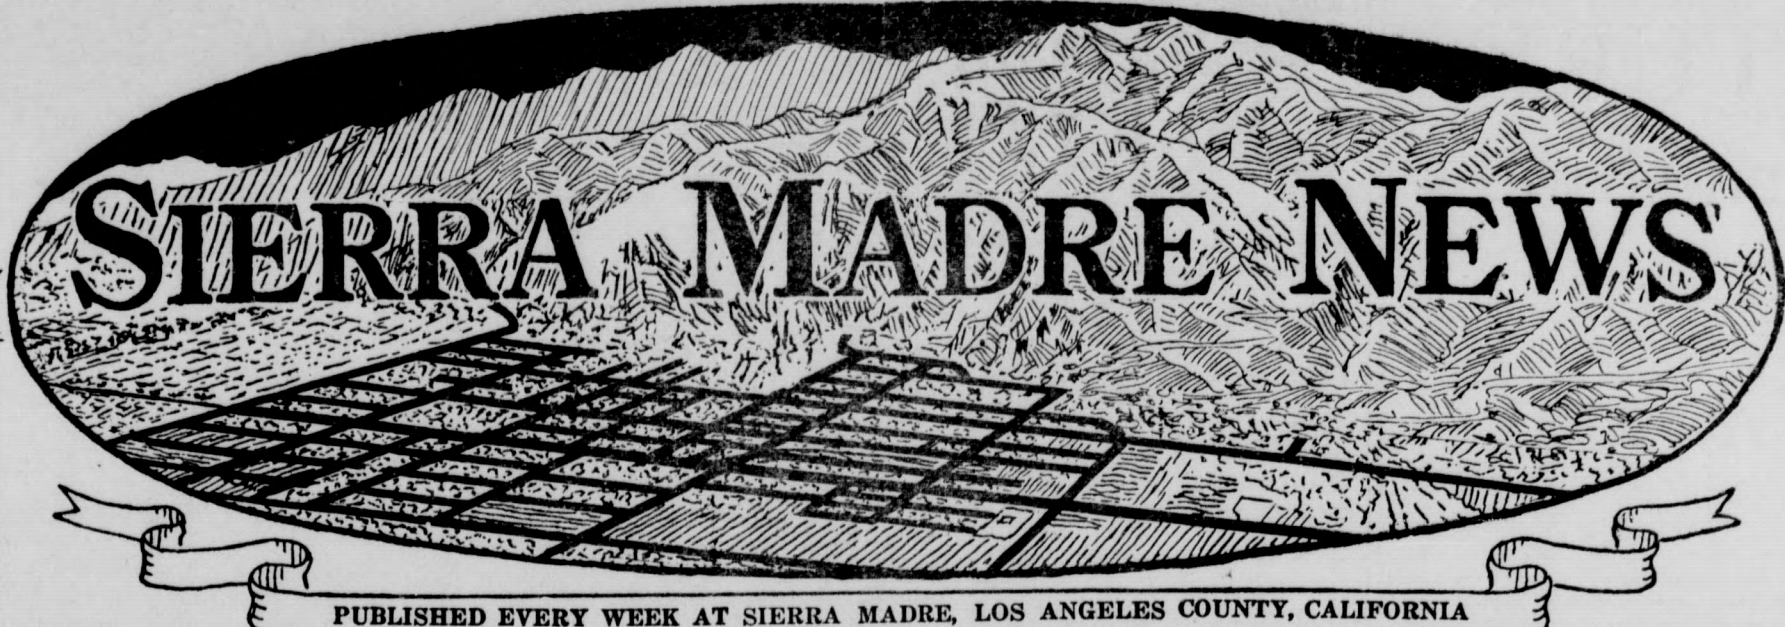

During the month of June, a series of nineteen field demonstrations for citrus growers of Los Angeles County will be conducted by Farm Advisor Robert W. Hodgson, and other members of the Farm Advisor staff, and will be held under the auspices of the Farm Bureau. The subjects for discussion and demonstration will be the pruning of citrus trees and the treatment for trees injured by frost.

An effort has been made by the Farm Advisor staff to gather together the best information on saving of badly injured citrus trees and the following up and pruning on less severely injured trees. From observations which have been made of some recent jobs of treatment of frost injured citrus trees many mistakes are being made which will probably result in poor trees or doing the work over again.

Growers in Sierra Madre and vicinity will have opportunity to witness a demonstration on the C. J. Pegler ranch, 415 East Live Oak next Wednesday at 2 P. M.

At 10 o'clock the same day there will be a demonstration on the Lambert Ranch on North Craig Avenue, northwest of Lamanda Park.

George Humphries was pleasantly surprised on Sunday, the occasion of his birthday anniversary, by a visit from several children. Those present were Mr. and Mrs. Paul Baugh and children, Miss Hilda Humphries, Mr. and Mrs. Elwood of Los Angeles, Mrs. Fisk of Chicago and Mrs. H. I. Hawhurst.

PUBLISHED EVERY WEEK AT SIERRA MADRE, LOS ANGELES COUNTY, CALIFORNIA

### "ABE MARTIN'S" CREATOR VISITS SIERRA MADRE

Miss Leah Fletcher of 634 West Highland had as guests on Wednesday Dr. and Mrs. John A. Leas of Los Angeles, Dr. and Mrs. Herbert T. Wagner and Mr. and Mrs. Kin Hubbard of Indianapolis. Mr. Hubbard is one of the celebrated press humorists of the country, being both a cartoonist and author. He is the creator of the character of "Abe Martin," a rustic philosopher whose observations are quoted by papers all over the country.

### TRIAL SUGGESTED FOR SEVEN O'CLOCK CAR

Result of Straw Ballot on Shuttle  
Service During Evening  
Hours

The referendum on the question of the proposed change in evening car service on the Pacific Electric aroused great interest, over four hundred votes being cast. Over a hundred citizens of Sierra Madre cast their ballots at the local polling place, the Sierra Madre P. E. Station.

The results of the voting were:  
Present schedule ..... 234  
Shuttle service ..... 183  
Through hourly service ..... 19  
Immaterial ..... 4

Of those voting for the present train service 141 supplemented their vote with a petition to the Pacific Electric for a through 7:00 P. M. car from Los Angeles.

In view of the great demand for a through 7:00 P. M. car from Los Angeles the Pacific Electric after consultation with Chamber of Commerce officials agreed to take the matter under advisement and has promised to notify the Chamber of Commerce within a few days as to their decision. In event of this additional service being instituted it will probably go into effect about July 1st. A test run will be made for thirty or sixty days to determine the advisability of continuing this additional service.

### C. OF C. LUNCHEON EVERY TUESDAY

Despite the fact that there seemed to be some misapprehension as to the day of the Chamber of Commerce luncheon a good crowd turned out. At this meeting a report was made as to the result of the car service referendum held on June 1st, a detailed statement of which appears elsewhere in this issue of the News. Remember the day, every week on Tuesday at noon at the Venture Inn. Everybody interested in Sierra Madre is invited to attend.

### OLSEN-BORGFORD

Mr. and Mrs. Martin Olsen announce the marriage of their daughter, Olga Helen Olsen, to Mr. Ulvar G. Borgford, on Monday, May 22, at Seattle. The bride is a native of Sierra Madre and grew to young womanhood here. The past four years she has resided in Seattle and there she met Mr. Borgford, a young business man. They will make their home in Seattle, residing at 3926 Meridian Avenue.

## Contest Winners Are Announced

Nine Correct Answers Received And  
Winners Are Selected  
By Lot

Nine correct answers were made in the News Lucky Bug Contest. The winners were chosen by lot and were drawn as follows:

BETTY MOORE, 45 Auburn Ave.  
MERRILL JENSEN, 561 W. Grand  
View.

JACKSON ZELLER, 93 W. Mira  
Monte.

Others who handed in the correct  
answer were as follows:

Frances Lord.  
Mrs. L. M. Rice.  
G. A. T. Curtis.  
William Jenkins.  
Claire Langley.  
Mrs. Florence Webster.

There were 20 Lucky Bugs in the  
paper, including the large one.

Interest in the Lucky Bug Contest was at a fever heat all of last Friday evening and Saturday. No sooner had the paper gone out to subscribers than inquiries began to come over the phone or in person as to details of the contest. Answers began to come in Friday afternoon and by six o'clock Saturday there was a big stack of them.

Young and old took part in the search for the Lucky Bugs, the trade marks of the Bonnet-Brown advertising cuts which the News is providing to make its advertising more attractive to readers and more effective for advertisers.

Some found only a small number of the Lucky Bugs, one reporting that there were four. Some with equal ease saw them where they were not, the highest number reported being twenty-four, or four more than there were in the paper.

### SIXTIETH WEDDING ANNIVERSARY OBSERVED

Mr. and Mrs. C. F. Stanley and Miss Alice Stanley participated Monday in the celebration of the sixtieth wedding anniversary of Mrs. Stanley's parents, Mr. and Mrs. Ephraim Miller of 588 N. Lake Ave., Pasadena. A large number of friends gathered to extend congratulations. The visitors included many alumni of the University of Kansas, where Mr. Miller held the chair of mathematics and astronomy from 1874 to 1910. One of the many pleasant features of the day was the receipt of a congratulatory telegram from 1,000 alumni and students of the University, assembled for commencement.

Mr. Miller was born near Carrolltown, Ohio, in 1833, was educated at Allegheny College, graduating in 1855. On June 5, 1862, he married Anna A. Hoge of Findlay, Ohio, where he was superintendent of schools from 1859 till 1870. In 1870 Mr. and Mrs. Miller went to Lawrence, Kan., where Mr. Miller was superintendent of schools until he became a member of the university faculty. Upon retiring as emeritus professor of mathematics and astronomy, they came to Pasadena where they have since made their home.

## Building Permits Show Big Growth

Activity Continues With Beginning  
of Summer According to  
City Records

Adoption of the municipal building ordinance and issuance of permits makes it possible to gauge the building activity of the city better than ever before. Indications from the records of Building Inspector George Cox are that the total for the half year ending June 30 will exceed \$150,000.

The building permits issued since the building ordinance went into effect January 12, 1922, show a total of \$133,609.00 in new construction work in Sierra Madre up to May 31st, incl.

Permits issued for the week ending  
June 7th:

F. A. D. Curtis, 377 N. Lima, garage, \$150.00.

R. D. Wilson, Alegria St., alterations, \$700.00.

C. F. Herman, S. M. Canyon Park, dwelling, \$600.00.

Lewis Brown, 144 San Gabriel Ct., garage, \$150.00.

Marie R. Solary, 129 E. Central, dwelling, \$2950.00.

Total to date, \$138,159.00.

### BOYS ARE RELEASED

The five Los Angeles boys arrested for burglarizing a cabin in the Big Santa Anita Canyon were released by the justice of the peace in Monrovia on a promise of good behavior. On account of their age the owner of the cabin was willing to withhold complaint, with the understanding that prosecution would follow if the boys became involved in any more affairs of the kind.

### Johnson on Probation

Dick Johnson was put on probation when brought up by Ranger Hayward on a charge of breaking and entering. He was unable to give satisfactory evidence of his right to be spending the night in a cabin, the owner of which had requested the arrest of anyone found therein without written permission.

### INTEREST CEASES ON VICTORY VOTES

Attention is called by treasury department officials to the calling of all 3 3-4 per cent Victory Liberty Loan Notes. This means that they will cease to draw interest on June 15 and there will be no object in keeping them. Holders of these securities should redeem them for cash or convert them into treasury savings certificates.

Record breaking business in wedding and birthday cakes has been done by the Sierra Madre Bakery recently. Mr. and Mrs. Sullivan report that they have even had an important order from Los Angeles this week and they have orders for a number of events yet to come. They have also developed a nice wholesale business in bread, their immense brick oven having a capacity sufficient to supply the needs of a number of stores outside of Sierra Madre as well as their local trade.

### LODGE WILL CONFER MASTER MASON DEGREE

Two candidates are expected to receive the degree of Master Mason at the meeting of Sierra Madre Lodge, F. & A. M., next Tuesday night. A large attendance is expected. On Monday there will be a practice meeting for officers and members.

### LOCAL TALENT GIVEN PROFESSIONAL RATING

Sierra Madre Skit at Annual Jinks  
Carries Off Chief  
Honors

Sierra Madre's contribution to the annual jinks of the Associated Chambers of Commerce at El Monte carried off a large share of the honors Tuesday night. The sketch was a one-act version of "Mrs. Temple's Telegram" played by Messrs. Hawks, McGregor, and Perry, and Mrs. H. E. Allen.

The program was given in the El Monte high school auditorium. The Sierra Madre number received the lion's share of applause, a good index of its reception being given in the comment of one individual who remarked: "Gee, they are all professional. Is up in Sierra Madre." Numbers contributed by Pomona and Claremont also stood out for excellence.

Preceding the program, the 500 members attending the event enjoyed a delicious banquet on the tennis courts. The menu was daintily and prettily served by the girls of the El Monte high school. Twenty-two members of the Sierra Madre Chamber of Commerce made up the local delegation.

### DEBATE AT CLUB HOUSE WATER AND POWER ACT

On next Monday evening June 12, at 7:30 at the Woman's Club House there will be an interesting and important debate between Dr. Horace Porter and Dean Shaw on the proposed initiative measure the "California Water and Power Act."

This proposed measure will be voted on at the coming November election. Rarely if ever, has such an important subject been presented to the people of California for their decision. It is so far reaching in its import that every voter in the State should so familiarize himself with the purpose of this act that he may understand and give an intelligent vote. Remember the time, next Monday evening at the Woman's Club House. This debate is under the auspices of the Woman's Club.

Members of Monrovia chapter, Order of Eastern Star, were guests of Sierra Madre Chapter at their regular meeting on Monday evening when the degrees were conferred on Mrs. Belle B. Chandler. The officers of the local chapter progressed one step higher in position when putting on the work. They were highly complimented by the visiting officers, Mrs. Reynolds, district deputy, Mrs. Fox, matron and Mr. Bashor, patron of the Monrovia chapter. After the chapter meeting dainty refreshments were served and a social hour enjoyed.

## Savings Bank Begins Business On Saturday

Tomorrow the Sierra Madre Savings Bank will open for business, providing an important addition to the business facilities of Sierra Madre.

The new bank will carry on its business in the quarters of the First National, the officers of which control the new savings bank. Harold E. Allen is president, C. S. Kersting is vice president, and W. H. Ingraham is cashier.

Savings and commercial business will be handled by the Sierra Madre Savings Bank. Especial attention will be given to the savings business, facilities for which have been lacking in Sierra Madre. The First National will continue to handle commercial banking business.

Lack of a savings bank in Sierra Madre has meant that a great deal of Sierra Madre money has been kept in out of town banks. Equally good service can now be obtained at home. The further advantage offered is that when the money is deposited in Sierra Madre it is available for loans on Sierra Madre property.

First mortgage loans for a term of years can now be made, which should prove especially advantageous to prospective home builders and home owners. One year is the limit on national bank loans, with a relatively small percentage of its funds available for realty loans.

With the Sierra Madre Savings Bank and the First National Bank available, Sierra Madre people will be able to find accommodations right here at home for practically every kind of banking business for which they have need.

### SLOANE SAYS SMOKERS CAUSE MOST FIRES

Forest Official is Making a Study of  
Causes of Destructive Fires  
In the Mountains

Tom Sloane, who has returned to his old post in Pasadena as head of the forest service in this portion of the Angeles reserve, stopped in Sierra Madre Wednesday in the course of a cruise along the south side of the range. He has just returned from a circuit which took him as far as Big Rock on the north side.

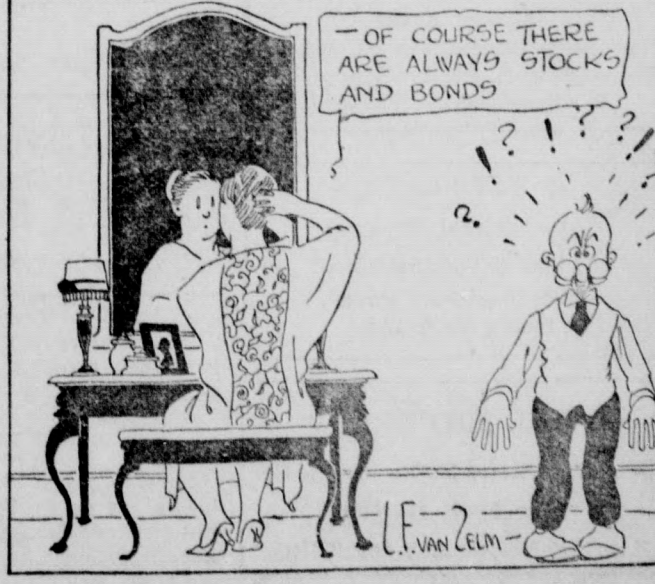

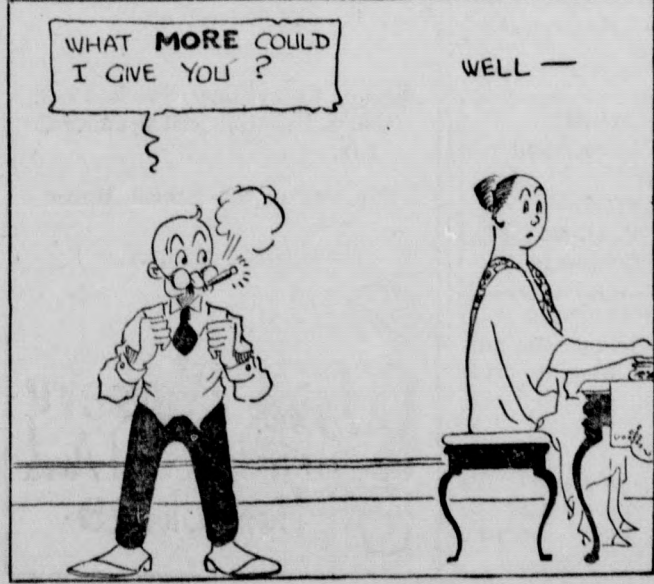

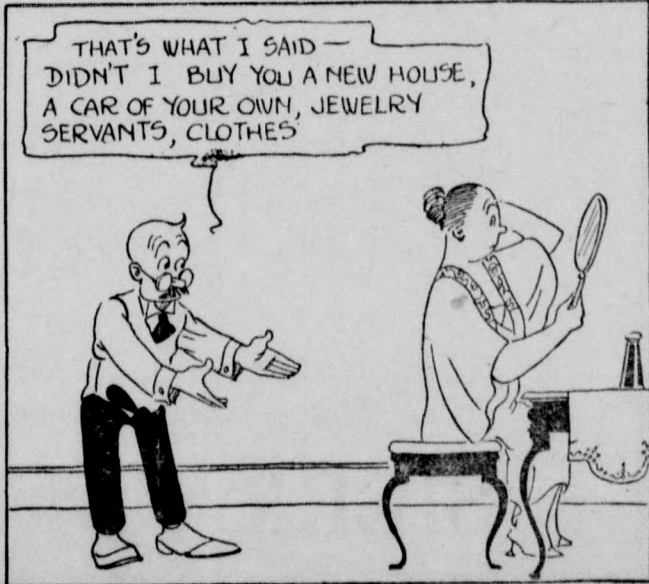

Mr. Sloane has been making a detailed study recently of the causes of all the fires in the forest reserve as far back as 1914. He finds upon tabulation that cigarettes stand at the top of the list of fire causes. He includes in this class matches thrown away after lighting the pipe, or butts thrown on the ground and not extinguished.

Cigar butts and pipe ashes will go out as a rule immediately upon being thrown to the ground. The paper on the cigarette seems to act as a flue and serves to keep the pesky thing burning until the last fragment of tobacco has been consumed. If thrown in the grass or leaves, or where the wind can blow it among inflammable material, a fire is the almost certain result.

Vigorous prosecution of all offenders against the fire regulations is the promise of Mr. Sloane. Several convictions have already been obtained this season.

Mr. and Mrs. George Humphries returned to their home last week after being away since the first week in February. During the week Mr. Humphries spent several days in San Diego county.

## Around Our Town

Mrs. Tasker M. Webster was the  
hostess at the meeting of the Modern  
Priscillas on Thursday.

Mr. and Mrs. Chillot of Anaheim  
spent Sunday visiting their friends,  
Miss Poage and J. H. Poage.

Mrs. Walter Ropp gave a surprise  
party on May 27th in honor of the  
11th birthday of her son, John.  
Fourteen young guests joined in the  
festivities.

Elizabeth and Howard Morgridge  
entertained a number of little friends  
last Saturday in honor of their sixth  
and third birthdays, respectively.

Mrs. Wagoner and daughter, Mrs.  
S. E. Armstrong, have rented Mrs.  
LeRoy's house on Bonita Avenue and  
will remain here for some time.

Miss Marjorie Thomas, a special  
teacher in the schools of Corona, spent  
the week end at the home of her aunt,  
Mrs. Howard Hill.

Mrs. C. K. Wood of Los Angeles  
has bought the residence of Mrs. Lor-  
illa Hollister at 121 South Lima, and  
will come here with her son and  
daughter to make her home.

Mrs. Fred Griebenow and Mrs. Mon-  
aco were guests at the Los Angeles  
Travel Club breakfast given at the  
Alexandria Hotel on Thursday of last  
week.

Mr. Otto Barnett and family who  
have been spending two weeks at the  
home of Mr. Barnett's sister, Mrs. A.  
L. Vanderburg of the Trail Inn, left  
on Tuesday for their home in Topeka,  
Kansas. They are returning by the  
Santa Fe Route.

D. C. Buell of Omaha spent the  
week end as a guest at the J. W.  
Krauter home. Mr. Buell is manager  
of the Railway Educational Bureau,  
consulting experts in railway fuel  
problems, with which Mr. Krauter was  
associated for several years before  
coming to Sierra Madre.

**Microbes and Disease.**  
Microbes in connection with disease  
were first written about by a German  
scientist in the Seventeenth century.

### CUT WORMS

You can rid your ground  
of them with Carco Vegeta-  
ble Spray. It also controls  
snails, slugs, eel worms, and  
kills Aphids. One quart makes  
50 to 125 quarts of spray.

Have you seen Brown's  
\$5 Bucket Sprayer?. It is a  
dandy. \$6.00 delivered.

110 E. Mira Monte

**"United We Stand, Divided We Fall."**  
The phrase is the motto of the state of Kentucky. Mark Twain proudly refers to this fact. "The armorial crest of my own state consisted of two disjunctive bears holding up the head of a dead and gone cask between them and making the pertinent remark: 'United We Stand, Divided We Fall.'"

**Canada's National Parks.**  
The Canadian national parks comprise an area of about 6,000,000 acres. They are sanctuaries for wild fowl, deer, mountain sheep and goat, moose, elk, bear and buffalo, and a tourist wonderland of forest, well-stocked streams and lakes, glaciers, hot springs, waterfalls and mountains.

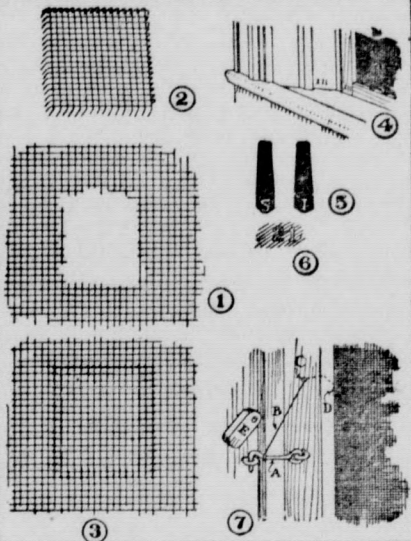

## HANDICRAFT FOR BOYS

By A. NEELY HALL

(Copyright by A. Neely Hall.)

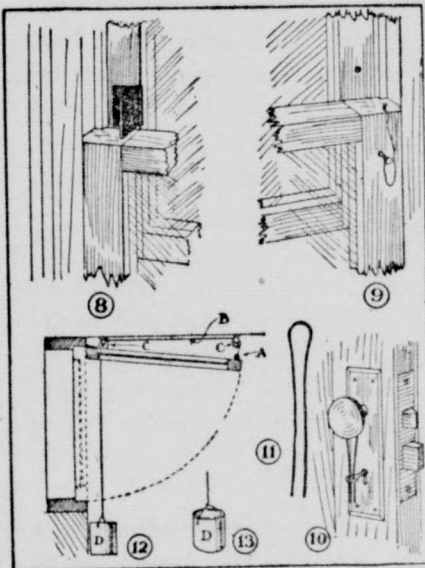

### THINGS ABOUT THE HOUSE FOR BOYS TO DO.

Suppose that Fig. 1 represents a hole to be patched. Cut a piece of wire 1/2 inch wider all around, then place the patch over the hole with the turned up wire ends sticking through

the meshes, and bend over the ends to hold the patch in position (Fig. 3). Screens and window openings to which they belong should be marked, so the right screens and openings can be located quickly. Fig. 4 shows the "Roman numeral" method, the figures being scratched in the wood with a knife. You will find this easy to do. However, steel punches (Fig. 5) make a neater appearance (Fig. 6), and if you can get half a dozen jobs of marking it will pay you to invest in a set of punches.

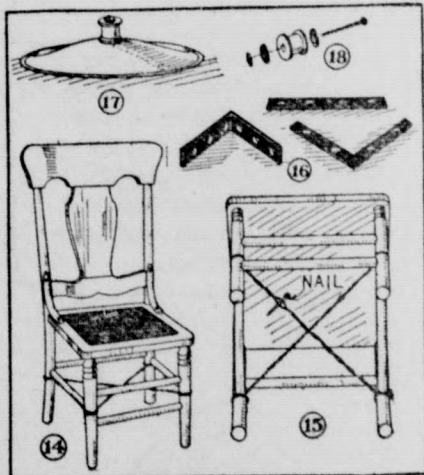

Fig. 7 shows a handy latch-string attachment for a screen door. Tie a cord, B, to the hook A, run it through a gimlet hole bored through the screen door at C, and to the end outside of the hole tie a

ring D. For a lock, screw a wooden button E to the door jamb.

Figures 8 and 9 show two excellent means of locking a window when opened several inches. The scheme in Fig. 8 consists of a square-butt hinge, screwed to the side stile of the upper window sash. When the loose flap is turned at right angles, the lower sash cannot be raised above it, but when folded flat the sash will slide by. The method in Fig. 9 consists in boring a hole through the lower sash, and through two-thirds of the thickness of the upper sash, then providing a nail or bolt to slip into the holes.

A piece of No. 8 gauge wire, bent into the shape of a hairpin, and slipped over a door knob with its ends dropped through the ring of the door key (Figs. 10 and 11), will prevent the key

from turning, and from being pushed out of its keyhole, thus providing a safeguard against lock-picking.

Basement and attic windows hinged at their top to swing in, are usually provided with hook-and-eye for hooking to the ceiling. A counterbalance arrangement like that in Fig. 12 is convenient. Screw a screw-eye into the lower rail of the sash (A), tie to it a piece of clothesline (B), and run the line over a pair of pulleys (C) screwed into the ceiling, then down to a tin-can weight (D).

Old chairs with loosened rounds may be made as strong as when new by first applying glue to the round-ends, then fastening doubled wires diagonally from leg to leg, and drawing these wires taut by twisting with a nail as a lever. (Figs. 14 and 15). Fig. 16 shows three forms of iron braces useful for bracing broken chair-backs and mending broken chair legs.

Knobs for replacing broken ones on mother's pot-covers, can be purchased cheaply, but a thread spool fastened with a short bolt (Figs. 17 and 18) answers the purpose admirably, and is easily put on.

**Freedom Based on the Bible.**  
It is impossible to enslave, mentally or socially, a Bible-reading people. The principles of the Bible are the groundwork of human freedom.—Horace Greeley.

Jud Tunkins.

Jud Tunkins says it's all wrong to think that in business friendship ceases. The fact that they are obliged to transact business with one another is all that keeps a lot of people even a little bit friendly.

The Art of Giving.

The art of giving is an integral part of the art of living.

Snowflakes All Hexagonal.

One of the odd facts in connection with snow crystals is that practically all of the hundreds of different varieties are hexagonal in form.

Daily Thought.

I love everything that's old; old friends, old times, old manners, old books, old wine.—Goldsmith.

- meat spoiled?

*- tell it to the Ice Man!*

Some day you'll learn that it really costs less to take ice regularly, than to try to keep house without it. The small amount you might save by doing without ice is more than eaten up every week in wasted, spoiled foods.

For ice really does save for you over and above its actual cost, in the expensive foods it keeps fresh and pure. Plus—better health—added comfort and finer living conditions.

There are two kinds of ice you can put in your refrigerator. Ordinary raw water ice, and ice that is made from water distilled to eliminate all impurities. Clear, sparkling distilled water ice costs you no more—if you are not getting it now, phone and our wagon will call at your door.

Subscriptions payable in advance. All new subscriptions will be delivered at once and be entered as of the first of the month following the date on which the subscription was made. Old subscriptions will expire on the first of the month following the present expiration date.

Copy for change of advertisement must be in the office by 10 a. m. Wednesday morning. New advertising copy must be in the office by noon on Tuesday

VOLUME 16, NO. 36.

FRIDAY, JUNE 9, 1922

It is not surprising to find a number of politicians promising the same job to as many different friends. But it takes a clever man to promise one job to two different people without any infraction of the truth. As a matter of fact the average politician is schooled in making perfectly meaningless remarks which trusting constituents interpret as binding pledges. When the politician says "I'll see what can be done for you," he is usually stalling for time. But the right look can send the applicant away happy enough to last until he is rudely awakened by the rattle of the empty pie tin.

Why diminish advertising expenditures during the so-called dull season? Some merchants still hold to the old idea that it is foolish to spend money to get business when there isn't any. The fallacy is in the notion that there isn't any business. The buying power of the public has not diminished. The demand has simply switched to other lines. The wise merchant switches his merchandise leaders according to the season and keeps on advertising as if he really wanted the business.

With three picture shows a week well patronized, how long will it be until Sierra Madre would support regular daily shows? Remember present facilities are not really suitable either for exhibiting pictures or housing audiences. With proper theater accommodations, it looks as if the time is ripe for somebody to make the venture.

Missourian complains that since 1918 he has not been able to find the combination of smoked herring, rye bread and pickled beets anywhere in the country. True, the verboten law does not cover them, but it doesn't leave anything strong enough to take the taste of that combination out of one's mouth.

Advocates of "light wines and beer" are so delightfully indefinite. They fail to specify how "light" they want them, and while they say they would not have saloons again they do not tell how they would have the "light" liquor dispensed. More light please.

Every once in awhile one finds a modern girl who seems to know all about dish rags—because she says she feels like one.

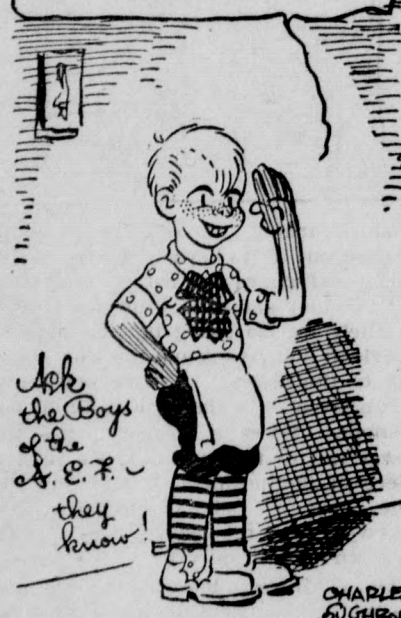

Americans are said to be eating twenty pounds of beef less annually than they did in 1920. Have you missed yours?

One of the best indications of a well developed sense of humor is an appreciation of the time not to laugh.

Starch in Human Foods.  
Starch is the only food that is changed in any chemical way in the mouth. Starch is gradually changed into sugar in the alimentary canal, the first process taking place in the mouth. Other foods are merely ground up and softened, in preparation for action by other juices.

Aluminum.

Aluminum is the most abundant metallic element in existence. Although it is more abundant than iron, it has not been used until the last 25 years, for it is found locked up so tight with oxygen that only the electric furnace can easily separate the two elements. It is an essential constituent of nearly all rocks except limestone and sandstone.—Dearborn Independent.

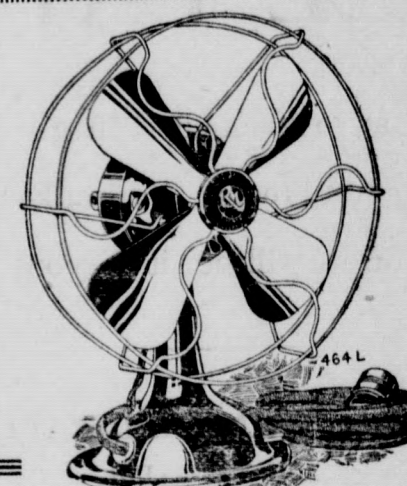

## RESIDENCE LOTS

A few choice lots, 23 in all, cut from the frontage of the East View tract on Canyon and Central avenues, are now offered for sale.

This property will be sold by the foot, in any number of feet you may require, minimum 50 feet; reasonable building restrictions.

The price is exceptionally low considering the location, wonderful view, and full bearing orange trees in excellent condition. Terms to suit the purchaser.

## WOMAN'S CLUB NEWS

By Press Chairman, Mrs. Besse Palm or Rhodes.

### Luncheon and Program

The luncheon at the club house next Monday being the last of the club season, it is hoped the reservations will be many. Mrs. Welsher, the efficient luncheon manager is willing to be taxed to the utmost capacity of the club house, in order to swell the fund she has accumulated from these splendid luncheons, and means to apply on the club house debt. There will be good luncheon speakers and a clever reader will occupy the afternoon program. Don't delay making reservations for Monday, June 12.

### Interesting Meeting

On Monday evening, June 12, an interesting discussion of the "Power and Water Bill," will take place at the Club House. Dr. Horace Porter, formerly mayor of Riverside, a foremost speaker on the subject, will talk in its favor. Dean Shaw of this city will take the opposition. These gentlemen were to have been luncheon speakers at the Monday meeting of

the Woman's Club, but in order that the citizens of Sierra Madre in general might share in this intellectual feast, a night meeting was arranged for, and other luncheon speakers engaged. It is hoped this will be appreciated by our citizens and that the club house will be filled Monday evening, June 12, at 8 o'clock.

### President Entertains

Mrs. J. Milton Steinberger was hostess at a very pretty luncheon, given at Venture Inn on Thursday, June 1. Guests were the members of the Drama Section of the Club, of which Mrs. Steinberger has been tutor. Clever cards marked places for ten at a table daintily decorated with pink Cecil Brunners. Following luncheon each guest read a section of some play, Mrs. A. T. Gay winning a prize, a beautiful book of poems, for guessing the greatest number of plays the readings represented. This luncheon was the culmination of a number of most interesting sessions of this section of the club.

### Ingenious Scheme Failed.

When I was in the seventh grade at school, relates a correspondent of the Chicago Journal, there were two girls I thought I was in love with, but I could not decide which one I liked best. So one day I thought I would write each a nice love letter exactly the same and I would then choose the one who answered the most favorably. But when they got their letters, each let the other know, so as to make her jealous. I wrote each again, but I got no reply at all.

### Proper Way to Display Flag.

When the American flag is hung as a banner the union, or field of stars, should be in the upper left hand corner. When hung with stripes perpendicular the union should be in the right-hand corner. When hung from a rope stretched from building to building across the street, on streets running north and south, the union should fly to the east, on streets running east and west, the union should fly to the north. When hung from a rope stretched from the house to a tree in the yard the union should fly toward the street.

### Her First Love Affair.

I experienced my first love affair when I was fifteen. I was going to school at the time, and there was a boy who took quite a liking to me. He called on me one Sunday afternoon. My father was at home at the time, and asked him if he saw the gate. He never came again. —Exchange.

### High Price for Manuscript.

The largest amount given for a modern manuscript was paid in New York for Thackeray's "The Rose and the Ring." The author wrote and illustrated it himself for a child friend; and when it was last put up at auction it realized \$23,000.

### Emergency Call.

"Is this the fire department?" yelled the excited professor of chemistry over the telephone. "Yes," answered a voice. "What do you want?" "How far is it to the nearest alarm box? My laboratory is on fire and I must send the call in at once." —American Legion Weekly.

### Ben Franklin's Parents.

Benjamin Franklin's father, Josiah Franklin, emigrated to America from England about 1685. His mother, a second wife, was the daughter of Peter Folger, a leading settler, noted for his philanthropy and tolerance.

### Daily Thought.

Truth is as impossible to be soiled by any outward touch as the sunbeam. —Milton.

### CERTIFICATE OF BUSINESS Fictitious Firm Name

The undersigned do hereby certify that they are conducting an electrical Contractors-Dealer business at 27 N. Baldwin Avenue, Sierra Madre, California, under the fictitious firm name of The Merit Electric Company and that said firm is composed of the following persons, whose names and addresses are as follows, to-wit:

Norman B. Jensen, Sierra Madre, California.

## There is no mystery about good oil

It must be made from crudes carefully selected for their "oiliness" and stability. These crudes must be refined to preserve their original characteristics and to make them pure.

In selecting crudes for Zerolene the Standard Oil Company has the advantage of its own large production of practically every type of crude. The company is not compelled to use any particular crude because it happens to be the only one available.

Crudes selected for Zerolene are brought to our refineries in special pipe lines. They are refined by our own patented, high-vacuum process which preserves their "oiliness" and stability.

No other refiner on the Pacific Coast uses any form of vacuum distillation. No other refiner in the United States uses as high a vacuum as this company.

### Purity Essential

Zerolene oils are pure. This company has always considered the removal of all detrimental properties and compounds as essential in making Zerolene.

Because of their "oiliness," stability and purity, Zerolene oils give perfect lubrication, and permit the development of the maximum power, speed and gasoline mileage of the car.

## RADIO

### CRYSTAL DETECTOR EASY TO CONSTRUCT

Telephone Condenser and Receivers Can Better Be Purchased—Mounting the Set.

The material needed to construct a simple crystal detector is as follows:  
Piece of silicon or galena molded in a metal button, 25 cents.

Two binding posts, 20 cents.

A block of shellacked or stained wood 3 by 3½ inches.

A thin strip of sheet copper or brass ¾ inches wide by two inches long.

Mount the two binding posts on the block of wood as shown, fastening under one binding post a strip of copper or brass—see sketch—and under the other binding post a coiled up spring of fine springy copper or brass wire. By placing the button of metal con-

ments, the tuner, the crystal detector and the telephone condenser, can be mounted on a stained base of wood, say, eight inches square and one-half inch thick. This will keep the component parts of the set together, making a compact unit of the whole and also be advantageous in that it will hold the instruments while adjustments are being made.

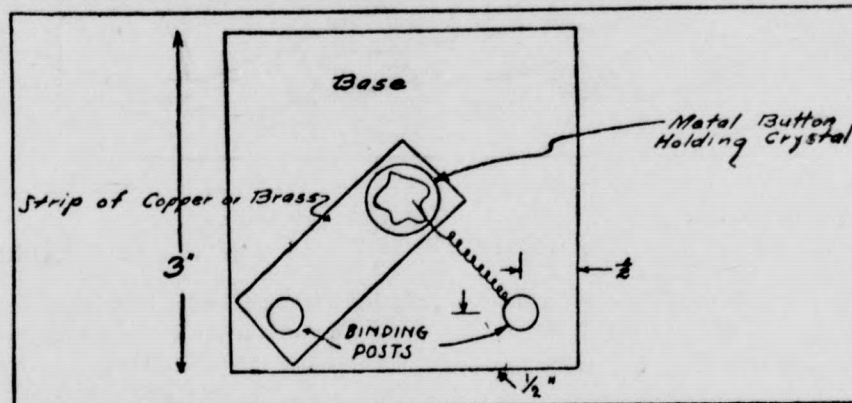

The sketch shows how the instruments are connected with each other and to the ground. The condenser is connected to one side of the tuner and to the crystal detector. The ground is connected to the other side of the phones and the condenser and the tuner.

Lamp cord is excellent for connecting up small radio sets of this kind—it being a good conductor, well insulated and easy to handle.

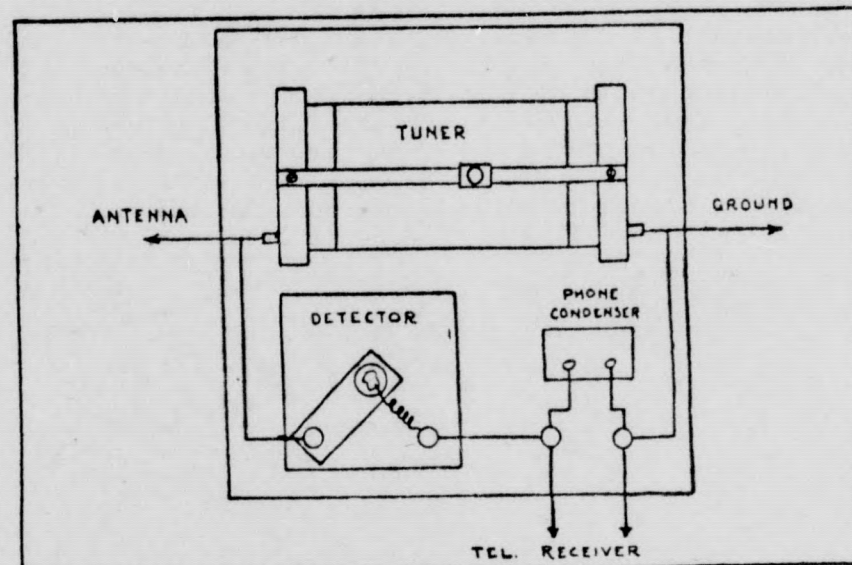

### HOW TO LISTEN IN

There are two variables in our radio receiver that require adjustment when it is desired to listen-in; first, the detector, and second, the slide position on the tuner. Once the slider position has been determined for any given transmitting station, it is only necessary to adjust the detector to pick up that same station again.

To operate the receiver for the first time it is best to wait until some station like KDKA is transmitting between 8:30 and 9:30 p. m. Then ad-

The Crystal Detector.

Set Mounted on Base, With Connections Shown.

taining the crystal of silicon or galena on the strip of metal and allowing the spring to make contact with the surface of the crystal the detector is complete and ready for operation.

A complete crystal detector can be purchased from 75 cents to \$2, depending upon the type.

Two other pieces of apparatus are necessary that cannot be readily constructed—they are the telephone condenser and the receivers. A telephone condenser to be used in shunting across the phones can be purchased for about 50 cents.

For use with a radio receiver of this type it is recommended that a pair of 3,000-ohm, Murdoch type, No. 50 receivers, costing \$6, be purchased. These are all the necessary parts needed for the complete receiver.

If it is desired, the three instru-

ments can be purchased for about \$12. Just the detector by changing the point at which the spring and crystal of the detector make contact until, when a nearby electric light is snapped on and off, a click is heard in the head phones. The detector is now adjusted on a sensitive spot on the crystal. By changing the slider position, the transmitting station should be picked up.

After a station is once picked up it is an easy matter to adjust the detector and slider position until maximum response is obtained in the telephone receiver. With a simple set of the kind described in this and preceding articles and a little practice one soon becomes adept at picking up a given station. The entertainment derived from listening-in is usually well worth the time spent and the money invested.

### VAGARIES OF VACUUM TUBES

Peculiar Actions That Always Astonish and Sometimes Frighten the Amateur Radioist.

Everybody who has had anything to do with vacuum tubes has from time to time had them do unexpected things and give results that at the moment seem beyond explanation.

The explanation of several characteristics of these miniature giants which are met with in daily operation is sure to prove of great interest to the amateur. In cases where the actions of the tube are not understood these peculiarities have sometimes frightened people.

One instance of a newborn fan's fright was brought to attention in a letter of inquiry. The instrument had just been set up and was being operated for the first time. The tubes had been firmly adjusted and were just at the spilling point and—over they went, giving vent to the most unearthly sounds. The embryo enthusiast who looked upon the audion tube as an electric light, thought it was going to explode. He jumped away from the instrument and out of the room, and did not venture near it for several hours, and then only after reaching round the corner of the door with a long stick and pulling the battery switch off.

Similar instances have come to attention when bulbs generate vari-colored vapors in the vacuum chamber.

### Moonshiners Using Radio.

Revenue officers seeking distillers of the far-famed and hardbitting "white lightning" in the mountains of Kentucky say that many raids made in the last few months have proven unsuccessful, due to the adoption of radiophone as a means of communication among the moonshiners.

### TIPS TO THE RADIOIST

Fired .22 caliber rifle shells make good switch points for tuning coils and receiving transformers.

A single wire aerial 100 to 150 feet long is sufficient for local and long distance reception of broadcasting stations.

Do not string aerials across the street or across electric wires. Keep antenna wires off electric light and telephone poles.

Stranded copper or solid copper wire should be used. Phosphor bronze wire if obtainable is stronger but not superior to copper.

Good contact with a piece of mineral like galena can be had by wrapping it in tinfoil. Of course, the top of the crystal is left exposed.

The brass ends of large cartridge shells make splendid crystal detector cups. They should be cleaned out thoroughly before they are used.

The winding of cardboard tubes from oatmeal boxes may be improved greatly if the tube is first heated in an oven for about 15 minutes to take out the moisture and then wound; or better still shellac it while it is still warm and leave it to soak in.

In winding tuning coils with bare wire a thread should be wound on with the wire. This will separate each turn. When the coil is finished the thread can be taken off. Shellac should be applied immediately. When the shellac is dry the copper wire will hold its place.

REV. W. H. RAWLINGS, LL.D., Pastor

Montecito and Baldwin Sts.

Sierra Madre, Cal.

VISITORS WELCOME

## FUSSING UP FOR CLASS-DAY FROLICS

Vacation days are near—class-day frolics and other "affairs."

Frocks and blouses, shirts and waists, and little suits must look their best. It means lots of fussing and sewing for mother.

But we can relieve you of the most tiresome of these tasks—the washing and ironing and we can do the cleaning and pressing too.

Bundle up the children's things with the family washing and the dry cleaning in another bundle and send them to us. We'll wash and iron them for you; we'll attend to the mending, and we'll return everything promptly, beautifully finished. And our dry cleaning department will make the kiddies' suits look like new.

Son and daughter will be delighted with the results; and you'll have ever so much more time to enjoy their fun with them.

Expensive?—not a bit. Try it this week and be convinced. Phone and our salesman will call.

## Of Local Interest

Born to Mr. and Mrs. Oswald Bergen this morning, a daughter.

Born to Mr. and Mrs. Orville Emley on Wednesday, a daughter.

Mr. and Mrs. Smith Wright Loggins returned home Friday after spending a week at Avalon.

A cooked food sale will be held at Welscher's store Saturday morning, beginning at ten o'clock.

Mr. and Mrs. E. H. Porter, 145 E. Alegria, are enjoying a visit from Mrs. Porter's brother, Mr. Harold Ham of Colorado Springs.

Mrs. Frank E. Barbour was the hostess on Thursday for a meeting of the "Neighborhood Twelve," a club of ladies from South Santa Anita.

The last meeting of the Parent-Teacher's Association will be held next Wednesday, June 14 at 2 o'clock, instead of 3. There will be a short program.

Mr. Preston Schwartz is enjoying a well earned three months vacation from his duties as head salesman for the Peck-Hill furniture Company of Los Angeles.

J. D. Draman of Los Angeles will open a shoe hospital at 22 N. Baldwin on June 15. He announces that he will install the latest machinery for repair work and will also carry a line of new shoes.

Mr. Allen T. Gay returned Tuesday night from a four days auto trip to Marysville where he has some ranch properties. He was accompanied by his brother-in-law, W. M. Crown and W. E. Farman of Sierra Madre.

Mrs. Ralph J. Lord is suffering with a lacerated hand, injured by the breaking of a glass fruit jar which she was attempting to open. The palm was so badly cut that Dr. Jackson found it necessary to take several stitches.

The Women's Guild of the Church of the Ascension will hold their next meeting, Friday, June 16 at the home of Mrs. F. J. Hart at Sierra Madre Villa. A picnic lunch will be enjoyed on the grounds. Those desiring to attend call Miss Vannier, Green 7.

The Missionary Society of the Congregational church will meet in the church parlors next Tuesday at 3 o'clock. Mrs. C. B. Reas will be the leader and will speak on the South Sea Islands which she visited a number of years ago.

Miss Muriel Wright and Mrs. Alice Bell of Long Beach have opened a new place of rest and refreshment under the name Canyon Tea Garden. It adjoins Stevenson's Canyon Store, just across from the swimming pool. They have shady quarters under the big trees and will serve lunches, afternoon tea and dinners, providing a service which will be appreciated especially by week end parties in the canyon.

Special week end rates from interior points to the beaches are offered by the Pacific Electric. Tickets are good going on Saturday or Sunday, returning not later than Monday. Rates from Sierra Madre will be as follows: To Long Beach, San Pedro, Redondo, Venice, and Santa Monica, round trip \$1.00; to Newport and Balboa, round trip \$1.25. These rates apply only on round trip tickets purchased from agents at stations.

Miss Helen Seeley whose wedding to Mr. Eugene Holliger of Los Angeles took place on Thursday was the recipient of a number of interesting social attentions during the week. Last Saturday evening Misses Gladys Kimball and Gladys Walker entertained at the Kimball home with a miscellaneous shower sixteen young ladies being present. On Monday evening, Mrs. Hall Perry entertained a number of friends who honored the prospective bride with a kitchen shower along with their felicitations.

Miss Ella Shepard Bush and Mrs. Ella T. Stork entertained on Monday with a luncheon and afternoon tea in honor of Miss Alice Grier of Los Angeles and Miss Fiske of Seattle. The luncheon guests included a number of members of the California Society of Miniature Painters. Other guests came in during the afternoon to enjoy the program by Miss Grier who is an accomplished pianist and teacher. Opportunity was also given to inspect the work of Miss Fiske in the studio of Miss Bush, as well as to compare the development of a landscape theme by several artists who spent a given time working upon the same subject.

**Sulphurous Language No Good.**  
The furnace is patient and long suffering. No matter how much the householder may swear at it, the furnace never gets hot just for that.—Boston Transcript.

### DELEGATION GOES TO HOLLYWOOD SING

Twenty-five Sierra Madre people attended the Hollywood Sing Tuesday evening at the special invitation of Hugo Kirchhofer, leader of the Sierra Madre Sing. The feature of the program was the rendition of six numbers by the Los Angeles Shrine Chanters, of whom Mr. Kirchhofer is also director. The Sierra Madre sing was mentioned several times during the evening and when gifts of honor were bestowed a beautiful bouquet was given Mrs. J. Milton Steinberger for her work in promoting the local enterprise.

### SEELEY-HOLLIGER

The marriage of Miss Helen Rosena Seeley to Mr. Eugene A. Holliger of Los Angeles took place Thursday morning at St. Rita's Church where the marriage service and mass were celebrated by Rev. Father Woodcutter. The bride was attended by her sister, Miss Mattie Seeley, and Mr. Norman Kenyon of Los Angeles acted as best man. Mrs. Charles B. Klunk was the soloist, with Mrs. William Murphy at the organ. The ushers were Lester Berry of Los Angeles and William Seeley. Following the wedding ceremony a delightful wedding breakfast was served at the home of Mrs. M. D. Welscher, sister of the bride.

The bride is the daughter of Mr. and Mrs. Frank B. Seeley, 453 Manzanita Avenue, and is one of the most charming and popular young ladies of Sierra Madre. Since her graduation from Pasadena high school she has held a responsible position with the Pasadena Star-News. The groom is a popular young business man of Los Angeles. Mr. and Mrs. Holliger will spend the summer at Santa Monica.

### SUNDAY SCHOOL RALLY

Bethany Temple Sunday School will hold a special rally next Sunday morning at 9:45. The Bible classes will unite with the other classes and the scholars will demonstrate their scriptural knowledge by rendering recitations and exercises. All parents and friends interested are invited to attend and see the results of the school work.

Dr. Rawlings, the pastor, delivered a striking message Sunday morning on the subject of the Lord's ascension into glory as the Son of Man. He announced that on next Sunday morning he would continue the theme and preach on the glory of Christ's second advent to the earth as the Son of Man. Everybody is invited.

### How Noiseless Is the Growth.

Much has been accomplished; more than people are aware, so gradual has been the advance. How noiseless is the growth of corn! Watch it night and day for a week, and you will never see it growing; but return after two months, and you will find it all whitening for the harvest; such, and so imperceptible in the stages of their motion, are the victories of the press.—De Quincey.

### Arkwright's Spinning Jack.

The Science museum, South Kensington, London, has acquired the only known specimen of the original Arkwright spinning jack, which has been in the Swain family for 150 years. It has 48 spindles, and is worked by hand with a five-foot wooden flywheel. Arkwright, after attempting perpetual motion, completed in 1768 a machine for spinning cotton thread.

### A Monopoly.

We never know what the future has in store for us—and the worst of it is we can't go to any other store.—Boston Transcript.

### PITTSBURGH PARTY ON AUTO TOUR

Mr. and Mrs. Ralph Williams of Pittsburgh, Pa., arrived Saturday for a visit with Mr. William's cousin, Frank E. Cox. They made the trip across the country in their Buick and are going on to San Francisco for the Shrine convention. Mr. Williams is proprietor of the Williams Gauge Co., of Pittsburgh, who manufacture an extensive line of steam specialties, the concern with which Mr. Cox was associated for many years. On Monday he piloted them on a sight-seeing trip down the coast as far as Tia Juana.

### CHILDREN'S DAY AT CONGREGATIONAL CHURCH

Special exercises for Children's Day will be held by the Congregational Sunday School next Sunday morning at 11 o'clock. The program to be given by the church school is entitled "Children of the Bible." The regular session of the school will not be held next Sunday, the only morning service being that at 11 o'clock.

### Longest Conclave in History.

There is no limit for the duration of a conclave of the sacred college at Rome. In the Middle Ages one conclave which met at Viterbo, about fifty miles from Rome, lasted over two years and a half. It ended only because the people of the town, impatient at the state of anarchy in which the pontifical states were thrown for the want of a ruler, climbed on the top of the palace where the cardinals were gathered and unroofed the building.

### Keep Coal Dry.

If coal is kept in a dry, airy place it will burn much better than if placed in a close, poorly ventilated cellar. Coal that is excluded from the air soon gets rid of its gas and the absence of this renders it more wasteful when burned.

### Term Gasoline Is Modern.

The geological survey says that there were some materials like our present gasoline used as far back as the Second century, but the name gasoline was coined within the last twenty or thirty years.

### MISS BAYNE TAKES AGENCY FOR RADIO

Miss Eleanor Bayne has taken the Sierra Madre agency for a line of radio apparatus manufactured in Los Angeles. The sets are moderately priced and Miss Bayne is assured that she can have all she requires for immediate delivery. The demand for radio apparatus has made it very difficult for dealers to make prompt delivery and Miss Bayne feels that she is very fortunate in securing the agency for apparatus which can be delivered as sold. In another column of the News she announces demonstrations of the new line.

FOR RENT—Furnished 4 room house call Blue 162. 36c

FOR RENT—Garage. Call Blue 162. 36c

FOR RENT—Furnished Apartment, Mrs. C. B. Reas, 223 San Gabriel Ct. Phone Blue 155. 35ctf

### NOTICE TO CONTRACTORS

The Board of Trustees of the Sierra Madre City School District will receive sealed proposals for the building of a four-room addition and other additions and alterations to their present school buildings and grounds. All bids must be in the hands of Wm. Carson Shaw, chairman of the board, by 12 o'clock, noon, June 16, 1922.

All bids must be accompanied by a certified check for five per cent of the amount of the bid, payable to the Sierra Madre City School District.

The Board reserves the right to reject any and all bids and the Contractor will be required to furnish an approved bond for 75 per cent of the contract price, and to complete the work on or before ninety days from the date of the acceptance of the bid.

Plans and specifications can be secured from Mrs. James N. Hawks at Sierra Madre, California. May 25, 1922. c34-36

### MONROVIA LODGE, B. P. O. E. No. 1427

Meets every Monday night at K. P. Hall, South Myrtle Avenue.

Initiation second and fourth Mondays.

Elk's Dance, Friday, May 26th.

### Aromatic Vinegar.

Aromatic vinegar is a solution of the volatile oils of cinnamon, cloves, lavender, juniper, peppermint, lemon and rosemary in alcohol, vinegar and water. It is used as a cooling lotion in headaches and fevers.
